

# Core PATCH Package Impact Report

**July 1, 2019 - June 30, 2020**

The Core PATCH Package is a replication coaching model that provides communities the training, support, resources, and materials to be successful in implementing PATCH's innovative and youth-driven educational intervention addressing adolescent patient-provider communication. The PATCH Program uses a simple online data sharing process to gather information from each of its licensed PATCH Sites. This Impact Report is a descriptive summary of what was submitted between July 1, 2019 and June 30, 2020.

As a community-based program, various factors impact data. Yet, unlike previous years, PATCH Sites were forced to make programmatic shifts in response to the COVID-19 pandemic in March 2020. Teen Educator Enrichment meetings went virtual, and many workshops were canceled; a few workshops were attempted virtually for the first time ever. Site Coordinators self-reported both successes and challenges in creating new and alternative forms of engagement, maintaining a committed and engaged group of youth, and partnering with key community-based institutions during this time.

## Overview

**7** Active PATCH Sites  
 A&C Indy  
 Central Wisconsin  
 Coulee Region  
 Dane County  
 HOPE Buffalo  
 Oklahoma City  
 Youth Rise of Clinton County

**16** PATCH for Providers Workshops  
**547** Provider Participants  
**24** PATCH for Teens: Peer-to-Peer Workshops  
**395** Teen Participants

**93** Trained & Certified PATCH Teen Educators

[Our biggest success was] getting through a difficult end of the year with COVID.

- Community Stakeholder of PATCH Site

In this field we commonly say youth should have a place at the table, we should involve them in the plans we make, but it does not happen often. [PATCH] brings those opportunities to life and we have seen great outcomes as a result.

- Community Stakeholder of PATCH Site

The Core PATCH Package has helped our community authentically engage youth in public health efforts.

- 100% of respondents on End-of-Year Site Coordinator Evaluation

# PATCH Teen Educators

At the END of their program year, the majority of Teen Educators self-identified as:

- **16** (23%), **17** (30%), or **18+** (40%) years old
- **Black or African American** (21%) or **White** (55%)
- **Female** (64%)

Percentage of Teen Educators who self-reported "Because of my involvement in PATCH, I..."

■ Yes, definitely   
 ■ Quite a Bit   
 ■ A little   
 ■ Not at All   
 ■ No Opinion

## LEARNING

## WORKING

## CONNECTING

## LEADING

## THRIVING

Even with a global pandemic and not being able to attend PATCH normally, this program was one of the highlights of my senior year... I've learned so many skills in this program and I'm so thankful that I got to be a part of it.  
- PATCH Teen Educator

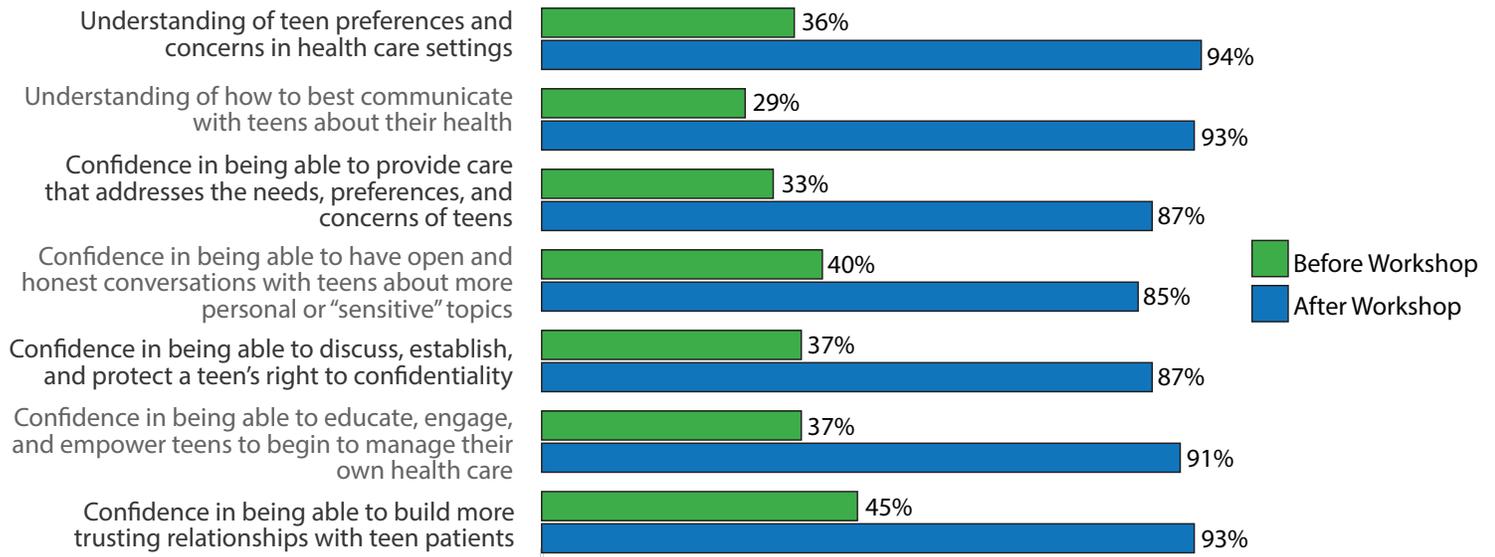

PATCH has made me view things in a different perspective and it made me want to try more in life.  
- PATCH Teen Educator

# 98%

believe that PATCH has been a positive turning point in their life

# PATCH for Providers Workshops

## Percentage of workshop participants who self-reported “high” or “very high”...

**86%**

said they were “likely” or “very likely” to utilize the knowledge and resources gained from the PATCH workshop in their practice.

**86%**

said they were “likely” or “very likely” to change the way they interact and care for teens because of the PATCH workshop.

## What else they told us...

**GREAT handouts!**  
The students were so enthusiastic and created a very open/welcoming environment.

This workshop forced me to reflect about what I believe regarding physician-teen interactions and challenged those beliefs. I will walk away from this workshop with a better appreciation for the teen perspective and what I can do to best facilitate their health and wellbeing.

Hands down to the honesty brought to the conversation! It's hard enough for anyone, especially teens, to be honest & vulnerable to their provider, let alone a room full of providers. Thank you!

**Overall rating = 4.36/5**

Note: Response rates for 8-Week Follow Up Evaluations were too low, limiting our ability to report any additional information.

# PATCH for Teens: Peer-to-Peer Workshops

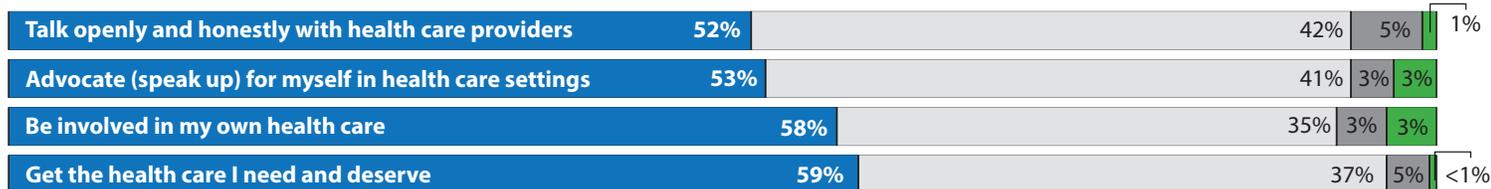

## Because of PATCH, I now KNOW...

Yes   
  Kind of   
  Already Knew   
  No

## Because of PATCH, I am \_\_\_ CONFIDENT in my ability to...

More   
  Same   
  Not Sure   
  Less

## Because of PATCH, I PLAN to...

Yes   
  Not Sure   
  No

## They thought the PATCH Workshop was...

65%  
Interesting

80%  
Useful

75%  
Easy to Understand

53%  
Fun

60% said they learned a lot from PATCH

67% said they liked learning from other teens

Overall rating = 4.03/5

Because of what I learned from PATCH, I have become more confident when going to health care appointments and am less worried about speaking up about my concerns and needs. - Youth Respondent of 8-Week Follow Up

Note: Response rates for 8-Week Follow Up Evaluations were too low, limiting our ability to report any additional information.
